

VAIBHAV POKHRIYAL

MERN-Stack Developer | AI Engineer | Data Science

+91-88263-67021 | vaibhavpokhriyal13@gmail.com | [Linkedin](#) | [Github](#) | New Delhi, India

PROFESSIONAL SUMMARY

MERN Stack Developer skilled in building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing RESTful APIs, implementing secure authentication, and building AI-powered applications with Gemini API, LangChain, and RAG. Strong foundation in Data Structures & Algorithms, Machine Learning, and Data Science, with a passion for building clean, scalable, and impactful software solutions.

TECHNICAL SKILLS

Programming Languages: Java - JavaScript - Python - R - C++ - SQL - HTML5 - CSS3

Front-End Development: React.js - React Hooks - Responsive Web Design - Component Architecture - State Management

Back-End and APIs: Node.js - Express.js - REST API Design - Middleware Architecture - JWT Authentication

Databases: MongoDB - Mongoose ODM - Schema Design

Cloud and DevOps: Vercel - Render - Docker - CI/CD Pipelines

AI and ML: LangChain - Retrieval-Augmented Generation (RAG) - Prompt Engineering - Gemini API - OpenAI API

Tools and IDEs: VS Code - Git - GitHub - Postman

WORK EXPERIENCE

Cantilever

Web Development Intern | 2024- 2025

- Built 5+ responsive React.js components with Tailwind CSS, improving user interaction speed by ~25% across client-facing portals.
Developed reusable RESTful APIs with Node.js/Express, reducing API latency by ~150ms and streamlining data handling for 3 core modules.
- Optimized MongoDB query performance via Mongoose indexing, achieving 30% faster data retrieval during peak usage.

EDUCATION

B.Tech in Computer Science (Data Science)

Maharaja Agrasen Institute of Technology | 2023 - 2027

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Machine Learning, Operating Systems, Computer Networks, Software Engineering.

PROJECTS

AI-powered Job Preparation Platform

React.js, Node.js, Gemini API, MongoDB

Developed an AI-powered career guidance platform that leverages Generative AI to provide automated resume analysis, interview coaching, and personalized skill-gap assessments for engineering students.

- Developed a full-stack AI-powered career guidance platform using React.js, Node.js, Express.js, MongoDB, and Google Gemini API for resume analysis, interview coaching, and personalized skill-gap assessment.
- Designed a secure MVC architecture with RESTful APIs and JWT authentication using HTTP-only cookies for user authentication and data protection.
- Integrated Google Gemini API and LangChain to generate real-time interview reports, technical Q&A, ATS resume analysis, and personalized study plans.
- Deployed the application on Vercel and Render with GitHub-based CI/CD, delivering a scalable and responsive user experience.

AI X-Ray Analyzer

Generative AI, Python, Flask, Computer Vision

Developed an AI-powered X-ray diagnostic support system that leverages deep learning and generative AI to analyze medical X-ray images, detect abnormalities, and assist healthcare professionals with diagnostic insights.

- Developed an AI-powered X-ray diagnostic support system using Flask, Python, TensorFlow, and OpenCV to analyze medical X-ray images and detect potential abnormalities.
- Integrated deep learning models with a Flask backend to perform real-time medical image classification and generate diagnostic predictions.
- Built an automated image preprocessing and inference pipeline to streamline medical image analysis and improve prediction efficiency.
- Containerized the application using Docker for consistent deployment across local and cloud environments.

LANGUAGES SPOKEN

English (Professional) - Hindi (Native)
